

Supply Chain Analyst/Manager

Job Description

Martin UAV is actively building a team of world-class employees to help assist in developing revolutionary unmanned aircraft systems technologies.

We are currently seeking an experienced Supply Chain Analyst/Manager to join the team in daily management and efficient operation of the purchasing, repair vendor management and logistics functions for a VTOL UAV. The successful candidate will work closely with our lead engineer and our production supervisor in a multidisciplinary avionics and aerospace environment. The ideal candidate should be able to contribute broadly but will be primarily responsible for all supply chain functions in support of the business.

Responsibilities

- Investigates problems, finds root causes, and coordinate development of solutions
- Gathers and interprets relevant data (costs, productivity, defect patterns, ect.)
- Provides analytical support for projects, new business opportunities, and proposals
- Ensures processes comply with all Government, Corporate, and Company requirements
- Develop and manage strategic supplier relationships and agreements for long term products
- Performs other related duties as required

Skills and Experience

- Required
 - Ability to deliver great results in short amount of time with minimal outside direction.
 - Supply chain experience at tech manufacturing and/or aero manufacturing company
 - Deltek/Costpoint experience is a MUST

Qualifications

- BS or MS in Electrical Engineering or related field is required
- 3-7 years of relevant aerospace industry experience

Compensation

We are located in Prosper, Texas and offer a comprehensive benefits package including medical, dental, vision and life insurance, 20 PTO days, and a 401(k) plan with company matching.
