

## Quality Engineer

### Job Description

Martin UAV is actively building a team of world-class employees to help assist in developing revolutionary unmanned aircraft systems technologies.

We are currently seeking an experienced Quality Engineer to join the team in developing, modifying, applying, and maintaining quality evaluation of our VTOL UAV software systems. The successful candidate will collaborate with engineering and operational sites to ensure quality standards are in place. The ideal candidate devises and implements methods and procedures for inspecting, testing, and evaluating the quality/compliance of our product.

### Responsibilities

- Analyze inspection and testing processes, mechanisms, and equipment
- Review and assist in approving engineering changes, procedures, and drawings
- Conduct quality audits and training
- Work with quality and design engineers to continually improve processes and methods
- Create and maintain Tool Calibration Management System
- Develop and implement Quality Control Plans and Company QMS
- Perform statistical analysis to assess the cost of and responsibility for, products or materials that do not meet required standards and specifications
- Audits quality systems for deficiency identification and correction
- Ensures that corrective measures meet standards and that documentation is compliant with requirements
- Experienced in review of engineering definition
- Review and provide feedback to Sales on customer specifications, purchases orders, etc., by recommending exception conditions and/or insuring customer requirements are properly converted into procedural requirements
- Ensure and internal and external corrective actions are implemented
- Obtain, administer and maintain various company and product-related certifications and qualifications
- Manage incoming Quality Assurance (IQA) and Quality Conformance Inspection (QCI) functions of the Quality Assurance Department
- Follow and support Lean and 6-Sigma initiatives
- Support Supplier Development and Audits as well as Internal Quality Audits
- Perform miscellaneous job-related duties as assigned

### Skills and Experience

- Ability to deliver great results in short amount of time with minimal outside direction
- Demonstrable knowledge of Aerospace Composites, Electrical, and Systems Engineering practices
- MRP experience with NCRs
- Deltek a BIG plus

### Qualifications

- BS or MS in related STEM field is required
- 3-7 years of relevant aerospace industry experience

### **Compensation**

We are located in Prosper, Texas and offer a comprehensive benefits package including medical, dental, vision and life insurance, PTO days, and a 401(k) plan with company matching.
