

Configuration Management Specialist

Job Description

Martin UAV is actively building a team of world-class team to develop and sale revolutionary unmanned aircraft systems technologies.

Martin UAV is seeking a first rate qualified Configuration Management Specialist to develop and guide configuration management projects. The successful candidate will work cross-functionally with our executive team, engineering, and production and supply chain teams. The ideal candidate should be able to contribute broadly and be eager to pursue a variety of projects in a fast-moving environment.

Responsibilities

- Develop and guide project and configuration management activities necessary to incorporate new products or product changes, in accordance with contractual, customer, program and regulatory requirements
- Review and analyze configuration data to control product changes
- Negotiate between organizations to develop incorporation plans and integrated schedules
- Monitor, ensure compliance, and report status on plans and schedules
- Interpret technical work statements, manufacturing plans and program level plans
- Monitor and analyze the incorporation plans and to resolve deviations with the value chain

Skills and Experience

- Strong organizational skills, ability to handle projects end-to-end
- Excellent analytical skills to understand data
- Strong computer proficiency, accuracy and attention to detail

Qualifications

- 2+ years of experience of Engineering Change Control and Configuration Management is required
- Bachelor's degree or higher from a top university; finance, economic, business, or engineering focus is a plus
- Demonstrated record of problem solving and analytical skills
- Knowledge of production systems
- Applicants must be U.S. persons as defined by the ITAR (22 CFR §120.15).

We are located in Plano, Texas and offer a comprehensive benefits package including medical, dental, vision and life insurance, PTO days, and a 401(k) plan with company matching.
